coursera

Идеи:

The screenshot shows the Coursera interface for the course "HTML, CSS, and Javascript for Web Developers". The sidebar on the left contains links to Overview, Syllabus, Creators, and Ratings and Reviews. The main content area includes a search bar, a breadcrumb trail (Home > Computer Science > Mobile and Web Development), the course title, a description, a "More" button, a "Who is this class for" section, the creator "Johns Hopkins University", and the instructor "Yaakov Chaikin". A blue circle highlights the "Enroll Now" button, and another blue circle highlights the "Search catalog" button. A yellow highlight is placed over the "Who is this class for" section.

- Възможност за лектора да насрочи лекция в бъдеще, където дава описание каква е лекцията (това "More", скрива част от текста и съответно я показва, изглежда готино), показва, за кои е подходяща лекцията, и има кратка справка за авторът ѝ.
- Възможност за задаване на кратко, точно и ясно заглавие.
- Корица зад заглавието би изглеждала добре от дизайнерска гледна точка.

- Възможност за рейтинг и ревю – ЗАДЪЛЖИТЕЛНО. Така всеки ще се бори за по – голям рейтинг.
- Споделяне – задължително – набира се повече популярност – това е в интерес и на лектора и на нас – създателите.
- Мотивиращи цитати и т.н.

Плюсове:

- Стилна, удобна платформа добре измислена, покриваща всякакъв материал.
- Издаваща някакви сертификати – ТРЯБВА ДА ГИ ПОГЛЕДНА.
- Възможност за платено и неплатено образование.
- Преподавателите са от съществуващи университети.
- Вид „промоции“
- Има вид quizzes и проекти
- Има recommendation система, какво би ти харесало
- Готино създадено отдолу за връзка, информация и т.н.
- Мобилно приложение

Минуси:

- Всичко е твърде платено, а когато не е платено не получаваш пълен достъп до всичко.
- Видео материалите са pre-recorded – няма я връзката на живо.
- Сертификатите все още не знам дали имат стойност
- Няма връзка за решаване на домашни и смислени задачи
- Няма добре развита комуникация – има форум, но там всичко е въпрос на доброволни отговори от потребители
- Няма нещо мотивиращо, всичко е сухо

Идеи:

- Супер готин и интуитивен дизайн

About this course

37 Reviews 4.5/5 ★★★★★

Project management is an essential skill-set for many careers and in many contexts in our lives. Introduction to Project Management is an ideal starting point if you need to manage projects at work or at home, while not necessarily being a formally trained project manager. It is also suitable if you are considering undertaking a project in the near future and are seeking to learn and apply essential

[See more](#)

What you'll learn

- Core knowledge and applied skills in project management
- Essential communication skills to help you manage a project
- An understanding of why today's projects are more complex

- Всичко е под формата на видео-клипове

Udacity

The screenshot shows the Udacity website interface. On the left, there is a sidebar with filters for 'TYPE' (Nanodegree Programs, Free Courses) and 'SKILL LEVEL' (Beginner, Intermediate, Advanced). Below these are filters for 'BUILT BY' various companies like Alteryx, Amazon, AT&T, Google, etc. The main content area displays a list of Nanodegree programs, each with a thumbnail, title, project count, and skill level. The programs listed are: Machine Learning Engineer Nanodegree by Google (Advanced, 10 projects), Intro to Programming Nanodegree (Beginner, 6 projects), Front-End Web Developer Nanodegree (Intermediate, 11 projects), Full Stack Web Developer Nanodegree (Intermediate, 15 projects), and iOS Developer Nanodegree (Intermediate, 14 projects).

Идеи:

- Интересна сортировка на курсовете, може да се помисли за нещо като филтър

This screenshot shows a detailed view of a Nanodegree program. The program is 'Intro to Programming', which teaches foundational skills for programming mobile apps, web pages, and data analysis. It is described as ideal for beginners. The page includes a student rating of 4.5 stars from 535 reviews, a timeline of 190 hours, and a skill level of Beginner. A salary section, powered by Payscale, shows a base salary range of \$52K to \$118K for programmers, with an average of \$85K. The program offers a one-week free trial and starts at \$199 USD per month. Graduates in 12 months receive a 50% tuition refund.

- Показва след завършване на съответният курс, каква средна заплата получавате в дадената област

Плюсове:

- Професионално ориентирано

- Наличие на free-trial

The screenshot displays a course overview with three project stages, each in a white box with a red vertical bar on the left. A blue progress bar is at the bottom.

- PROJECT Stage 1: Make a Web Page**
You will learn the basics of how the internet works and how documents written in a language called HTML form the backbone of the Web. In the project checkpoint at the end you'll write HTML and CSS (another language) to give your web page style.
- PROJECT Stage 2: Build a Mad Libs Game**
This is where you'll learn how to program. You'll learn a programming language called Python and you'll use it to write instructions that the computer can understand and execute. After this stage you will have incredible power: you will be able to automate almost any repetitive task that can be done on a computer. In the project checkpoint you will write a program in Python to build a reverse Mad Libs game.
- PROJECT Stage 3: Create a Movie Website**
In this stage, you will learn an entirely new approach to programming (and thinking) called Object Oriented Programming and how to use this approach to build impressive programs by simply reusing or modifying computer code that others have already written. In the project checkpoint you will create a simple movies webpage with images and trailers.

- Хронологична подредба на курса

The screenshot shows a 'Student Success Story' for Kelly Marchisio. It includes a quote from her, her title as a Nanodegree Graduate and Web Solutions Engineer at Google, and logos of companies that have hired Nanodegree graduates: cloudera, mongoDB, facebook, and Google.

Student Success Story

"I literally knew nothing about computer science... it gave me a really good foundational base in web development, and I'm excited to put that to use in the workplace."

NANODEGREE GRADUATE

Kelly Marchisio

Web Solutions Engineer, Google

OUR NANODEGREE GRADUATES HAVE BEEN HIRED BY INDUSTRY LEADING COMPANIES

cloudera mongoDB facebook Google

- Мотивиращи цитати и примери за успели хора
- Наличие на система за задачи и упражнения, и съответен feedback

Минуси:

- Всичко е платено
- Обученията са във формата на видео
